

## Supply and Delivery of Audiovisual Conferencing System for MCA-Nepal (MCA-N/PM/SH/024)

### CLARIFICATION #1

No.	Question	Answer
1	<p>In the technical specifications of <b>‘Item 1: TV Screens for VTC’</b>, there are several terms such as “Live Color™ Technology”, “4K X-Reality™ PRO”, “TRILUMINOS™ Display”, etc. which are trademarked terms of Sony and specific only to their products. Please let us know if we can quote products with similar specifications of other brands as well or you are specifically looking for Sony products.</p>	<p>As the screens are bigger sizes, VTC operating equipment requires the Screen which has a very efficient – color, video and sound processing technologies used.</p> <p>The listed features may more matched with Sony, however we will consider other brands – Samsung, LG, Phillips or equivalent.</p> <p>The ideal VTC screen requires the latest picture processing, HDR (Dobly, HDR10+ etc.) and buffering technology used, to play with fluctuated bandwidth and latencies.</p>
2	<p>The project is titled “<b>Supply and Delivery of Audiovisual Conferencing System</b>”, but in the Schedule of requirements, only TV Screens and Smart UPS are mentioned. Please suggest if conferencing systems are required as well or only the TV Screens and UPS are to be quoted at this time.</p>	<p>Exactly, a part of Conferencing System is already endorsed under this procurement.</p> <p>This time, we are just looking for a good quality TV screens to be used for VTC system and power backups. Vendors need to quote only for items listed in bill of quantity.</p>
